Professional Summary

Motivated Computer Engineering graduate seeking an entry-level software development role where I can apply my technical skills, problem-solving abilities, and passion for learning while contributing to organizational growth.

Education

- **B.E. in Computer Engineering**, SKN Sinhgad Institute of Technology and Science, Pune (2022–2026): **CGPA – 8.6**
- **12th HSC** – 83%, Chh. Shahu Academy and Jr. College, Satara
- **10th SSC** – 89.2%, Satara English Medium School, Satara

Technical Skills

- **Languages:** Java, JavaScript, HTML, CSS
- **Frameworks/Libraries:** ReactJS, Node.js, Express.js, Bootstrap
- **Databases:** MongoDB, MySQL
- **Cloud & Tools:** AWS, Git, GitHub, VS Code, Docker, Kubernetes
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **Soft Skills:** Leadership, Team Collaboration, Communication, Adaptability, Problem Solving

Projects

LaboLink Application – (Live Demo)

2026

- Developed a service-based web application that connects users with nearby skilled labourers using location-based search.
- Implemented labour categories including electricians, plumbers, painters, mechanics, carpenters, and other household service providers.
- Built detailed labour profiles displaying experience, service information, pricing, and contact details for users.
- Integrated Leaflet Maps API to provide location-aware search and improve user experience for finding nearby workers.
- Developed using ReactJS, Node.js, MongoDB, JavaScript, Bootstrap, HTML5, and CSS3.

HardwareHub – (Live Demo)

2026

- Built a full-stack hardware marketplace with role-based access for customers, shop owners, and admins using Next.js 14 (App Router).
- Implemented a request-and-response quoting system enabling customers to post requirements and shop owners to submit competitive offers.
- Built shop/product management dashboards with Cloudinary image uploads and server-side paginated, category/city-filtered search.
- Integrated NextAuth.js authentication, a customer review system, and transactional email notifications via Resend.
- Developed using Next.js, React, MongoDB, Tailwind CSS, and NextAuth.js.

Student Grading System

2024

- Developed a Java console application to manage student records and calculate academic performance.
- Applied Object-Oriented Programming principles and utilized HashMap for efficient student data management.
- Implemented a menu-driven interface for adding students, calculating averages, percentages, and assigning grades automatically.

Certifications

- **Alpha – DSA with Java (Apna College)**
- **Delta – Full Stack Web Development (Apna College)**

Co-Curricular Activities

- **Techtonic** – Coordinator
- **Spandan** – Volunteer

Languages

- English, Hindi, Marathi

Interests

- Driving
- Walking
